

# ICD 2005 Auxiliary Application Guide

The ICD Auxiliary Interface operates as an audio opener that enables the audio from an external source, such as DVD, VCR, MP3 etc to be played through the vehicles OEM stereo system when in CD mode.

This interface will only allow the volume of the auxiliary source to be adjusted from the head unit; the functionality of the source cannot be adjusted from the head unit.

**Please note because this interface connects to the head unit via the CD port this interface cannot be utilised when the vehicle has a CD changer fitted.**

Applicable Vehicle Details	Comments / Additional Information	Interface Part Number
<b>AUDI</b>		
A2, A3, A4, A6, A8 & TT (97 > 00)	Head Units: Concert/Symphony. For Vehicles Pre-installed with factory bus-lead. <b>Connect interface to the pre-installed bus-lead.</b>	VAGX3
